

SAKHIYA SKIN CLINIC®

INDIA'S NO.1 SKIN CLINIC CHAIN

Clear Mind Clear Skin - LHR

18th April 2024

What are Lasers?

Lasers are special devices that produce concentrated beams of light. In skin treatment, lasers are used to target specific skin issues like wrinkles, scars, unwanted hair, or discoloration. The intense light

energy from lasers can remove damaged skin cells, stimulate collagen production, or destroy hair follicles, depending on the type of treatment needed.

What Exactly is A Laser Treatment? Or How Do Laser Treatments Work?

- Curious about laser treatment? Picture it as your skin's superhero, using light power to zap away imperfections. It's like casting a magic spell on your skin, saying goodbye to unwanted hair, pigmentation, and more! There is no limit to what laser treatment can TREAT or ENHANCE on your face and body.
- Keeping that in mind, we, at Sakhiya Skin Clinic, religiously make you as Radiant as anyone could be. Here's the list of our Laser Treatments:

Tired of the Endless Cycle of Waxing, Shaving, and Plucking? Discover the Ease of Lasting Smoothness with Laser Hair Removal

Types of Laser Treatments: Let's Dive In!

Welcome to Sakhiya Skin Clinic, where we offer cutting-edge laser treatments for all your skincare needs. Our four categories of Laser include an array of LASER treatments you could think of. From laser hair removal to pigment correction, and from PICO LASER to EBD (Energy Based Devices), utilize these treatments to ensure effective and safe results tailored to your unique skin concerns.

01

LASER HAIR REMOVAL:

At Sakhiya Skin Clinic, we proudly provide an extensive array of advanced laser treatments, carefully curated to cater to a wide range of skincare needs and concerns. So, are you seeking a personalized and trustworthy laser hair removal treatment? Our clinic stands ready to offer the highest standard of care with our comprehensive suite of laser therapies:

Say "adios" to razor burns and waxing woes! Laser hair removal banishes unwanted hair for good, leaving you with silky smooth skin. It uses strong beams of light to get rid of unwanted hair. The light goes into the hair, damages its root, and stops it from growing back again.

Benefits:

- Say goodbye to razor burns and waxing woes.
- Achieve long-lasting smooth skin.
- Reduce ingrown hairs and irritation.

AFTER

Invest in your skin.

It's going to represent you for a long time

Various Laser Treatments

Be ready to dazzle with flawless skin at Sakhiya Skin Clinic! Our cutting-edge laser treatments, including Diode, Nd Yag, Triple Wavelength, Alexandrite, and IPL, ensure the ultimate glow-up experience. Say hello to radiant skin and bid adieu to pigmentation worries – because beauty begins here!

Diode

Diode laser treatment uses focused light beams to target skin issues like hair removal or acne. It's precise, effective, and involves minimal discomfort, making it a popular choice for skin rejuvenation with fast recovery.

Benefits:

- Precision targeting for accurate treatment.
 - High effectiveness in addressing various skin concerns.
 - Minimal discomfort and downtime, allowing for quick recovery and resumption of daily activities.
-

Triple wavelength

Triple-wavelength laser treatment uses three different light wavelengths to target hair follicles at various depths, providing effective and long-lasting hair removal. It's versatile, ensuring optimal results for different skin and hair types.

Benefits:

- Enhanced efficacy: Targets hair follicles at multiple depths for more comprehensive and effective hair removal.
 - Versatility: Suitable for various skin and hair types, including darker skin tones and finer hairs.
 - Reduced discomfort: Advanced technology minimizes discomfort during treatment, leading to a more comfortable experience for patients.
-

Alexandrite

Alexandrite laser treatment uses a specific type of laser to target hair follicles for removal. It's effective, quick, and commonly used for hair removal on large areas like legs and back, providing long-lasting results.

Benefits:

- Speed: Fast treatment sessions due to larger spot size.
- Effectiveness: Efficient removal of hair on large areas.
- Safety: Minimal discomfort and fewer side effects compared to other methods.

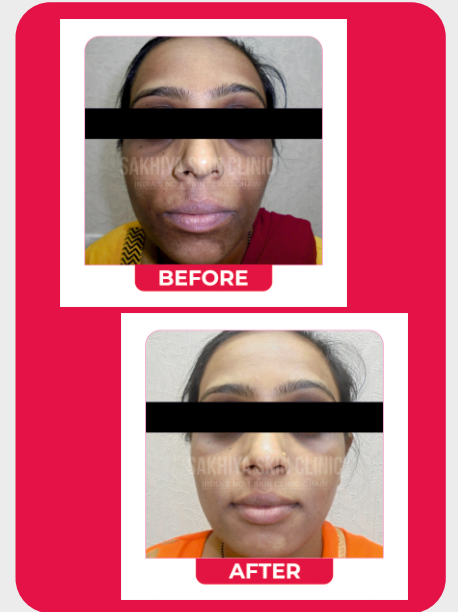

Worried about Pigmentation?

02

PIGMENT LASER:

Say goodbye to pigment woes with Sakhiya Skin Clinic's top-notch pigment laser treatments! Our cutting-edge solutions zap away unwanted spots and blemishes, leaving you with radiant, flawless skin. Experience the magic of our treatments and shine brighter than ever before!

Pigment laser treatment uses specialized lasers to target and break down excess pigment in the skin, treating issues like age spots, sun spots, and uneven skin tone. It's effective, safe, and helps achieve clearer, more even skin. Apart from Q Switch and Pico Laser, we also offer Nd Yag Pigment Laser treatment. Let's dive deeper:

Q SWITCH:

Stubborn pigmentation? Not anymore! Q Switch laser targets those pesky spots, revealing a brighter, more even complexion. This treatment delivers short, high-energy pulses of light to target and break down pigmentation, such as age spots, sun spots, and freckles.

Benefits:

- Targets stubborn pigmentation effectively.
- Reveals a brighter and more even complexion.
- Minimizes the appearance of skin imperfections.

PICO LASER:

Time to bid farewell to acne scars and fine lines! Pico laser works its magic in record time, rejuvenating your skin for a youthful glow. It utilizes ultra-short pulses of laser energy to target and break down pigmentation, acne scars, and fine lines. It works by stimulating collagen production and rejuvenating the skin.

Benefits:

- Fade away acne scars and fine lines.
- Achieve smoother and more youthful-looking skin.
- Minimal downtime with quick and effective results.

You don't choose to get it, but you can choose to get rid of them - Scar Treatment

03 SCARS

Give a farewell to scars at Sakhiya Skin Clinic, where our stellar laser treatments work wonders! Our innovative solutions target scars with precision, unveiling smooth, flawless skin beneath. Don't let scars hold you back – trust us to help you reclaim confidence and radiance.

Laser treatment for scars uses focused light to reduce the appearance of scars by stimulating collagen production and remodeling skin tissue. It's effective, safe, and can improve the texture and appearance of scars.

FRACTIONAL CO₂ LASER:

Ready to turn back the clock? Fractional CO₂ laser resurfaces your skin, reducing wrinkles and acne scars for a fresh-faced look and using fractional laser technology to target and vaporize damaged skin cells. It promotes collagen production and reveals smoother, rejuvenated skin.

Benefits:

- Reduce wrinkles and acne scars.
- Improve skin texture and tone.
- Achieve a fresher and more youthful appearance.

ERBIUM YAG LASER & ERBIUM GLASS LASER:

These twins work wonders on your skin! Erbium lasers tighten and rejuvenate, giving you a radiant complexion with minimal downtime. With the use of a laser beam, it removes superficial layers of skin, promotes collagen production, and tightens the skin.

Benefits:

- Tighten and rejuvenate the skin.
- Reduce the appearance of fine lines and wrinkles.
- Minimal downtime with quick recovery.

Transforming aging into ageless with HIFU-

04

EBD (Energy Based Devices)

Revitalize your skin with Sakhiya Skin Clinic's top-notch energy-based device treatments! Experience the magic of our advanced technologies, ensuring unparalleled results. Say goodbye to dullness and hello to a radiant complexion. It's time to shine with confidence – because beauty begins with us!

Energy-Based Devices (EBD) laser treatment uses different types of energy, like light or radiofrequency, to target and treat various skin issues such as wrinkles, scars, and pigmentation. It's versatile and effective for skin rejuvenation.

HIFU:

Lift and tighten like never before! HIFU (High-Intensity Focused Ultrasound) treatment delivers focused ultrasound energy deep into the skin, targeting the deep structural layers and stimulating collagen production.

Benefits:

- Lift and tighten sagging skin.
- Improve jawline and neck contour.
- Achieve a more youthful and lifted appearance.

BEFORE

AFTER

RF:

Radiofrequency magic! RF (Radiofrequency) treatment uses radiofrequency energy to heat the deeper layers of the skin, stimulating collagen production and tightening loose skin.

Benefits:

- Tighten and firm sagging skin.
- Reduce the appearance of cellulite.
- Improve skin elasticity and texture.

BEFORE

AFTER

Reveal your Best self with Sakhiyas laser based treatments

CRYOLIPOLYSIS:

Cryolipolysis laser treatment, also known as "fat freezing," targets and reduces stubborn fat pockets by cooling them to freezing temperatures, causing fat cells to crystallize and be naturally eliminated by the body.

Benefits:

- Non-invasive: No surgery or needles are required, reducing risks and downtime.
- Targeted fat reduction: Precision targeting of specific areas without affecting surrounding tissues.
- Effective: Visible fat reduction with natural-looking results.

BEFORE

AFTER

EMS FOR BODY SHAPING:

Get ready to sculpt your dream body! EMS (Electrical Muscle Stimulation) for body shaping is a non-invasive treatment that uses electrical impulses to stimulate muscle contractions, targeting stubborn fat and toning muscles.

Benefits:

- Sculpt and tone muscles for a more defined physique.
- Reduce stubborn fat deposits.
- Improve muscle strength and endurance.

BEFORE

AFTER

CAVITATION:

Blast away fat cells! Cavitation treatment uses ultrasound technology to break down fat cells in targeted areas of the body, resulting in fat reduction and body contouring.

Benefits:

- Reduce localized fat deposits.
- Sculpt and contour specific body areas.
- A non-invasive alternative to liposuction with minimal downtime.

Other Laser Treatments:

At Sakhiya Skin Clinic, we're your ultimate destination for cutting-edge laser treatments! Experience the pinnacle of skincare innovation with our Vascular Laser, Ultrapulse CO₂ Laser, Endolift, and Cryolipolysis. Say hello to flawless skin and bid farewell to imperfections – because at Sakhiya, we make beauty effortless and fun.

Skin Rejuvenation at its Best

05 VASCULAR LASER:

Say goodbye to visible veins and rosacea! Vascular laser treatment targets blood vessels and redness in the skin, such as spider veins and rosacea, using laser energy to heat and destroy the targeted blood vessels.

Benefits:

- Reduce visible veins and redness.
- Improve skin tone and texture.
- Achieve a clearer & calmer complexion.

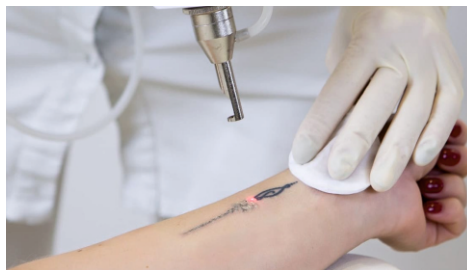

BEFORE

BEFORE

Here are various types of VASCULAR LASERS available at Sakhiya Skin Clinic:

PDL (Pulse Dyed Laser)

Discover the transformative power of PDL (Pulse Dyed Laser) at Sakhiya Skin Clinic. Harnessing a focused beam of light, it delicately eradicates vascular concerns such as rosacea and spider veins. Enjoy its amazing outcomes like: pinpoint accuracy, gentle on surrounding tissue, and a speedy recovery, unmatched by other methods.

Benefits:

- Pinpoint Accuracy: PDL precisely targets blood vessels, guaranteeing effective treatment without harming surrounding tissue.
- Minimal Risks: PDL minimizes skin damage, lowering the chances of scarring or pigmentation alterations compared to other methods.
- Swift Healing: PDL ensures rapid recovery, enabling patients to return to regular activities faster than with alternative therapies.

Glow and Go with advanced treatments

YELLOW LASER

Experience the pinnacle of skincare innovation with our Yellow Laser treatment. Targeting stubborn pigmentation, sunspots, and melasma with unparalleled precision, it offers remarkable results with minimal downtime. Trust us for the finest in dermatological care and rediscover your radiant, flawless skin today!

Benefits:

- Precision Targeting: Yellow Laser precisely tackles pigment issues like sunspots and melasma.
- Minimal Downtime: Swift recovery compared to alternatives, ensuring minimal disruption to your routine.
- Enhanced Clarity: Enjoy a radiant complexion and improved skin tone, boosting confidence.

Long Pulsed Nd Yag

A long-pulsed neodymium: yttrium-aluminum-garnet (Nd:YAG) laser is a solid-state laser that produces a near-infrared wavelength and is used to treat vascular lesions that are resistant to conventional therapies. The laser's 1,064-nm wavelength allows it to penetrate deeply without sacrificing hemoglobin absorption. It's ideal for treating lesions that are: Thick or deep, Off the face, and Have a high concentration of hemoglobin

Benefits:

- Deep Penetration: Effectively treats deep vascular lesions.
- Hemoglobin Absorption: Targets lesions with high hemoglobin concentration.
- Thick/Deep Lesions: Ideal for treating thick or deep vascular lesions.
- Off-Face Lesions: Suitable for lesions located off the face.
- Resistant Lesions: Effective for lesions resistant to conventional therapies.

IPL

Illuminate your skin! IPL (Intense Pulsed Light) treatment uses broad-spectrum light energy to target various skin concerns, such as pigmentation, sun damage, and vascular lesions.

Benefits:

- Improve skin tone and texture.
- Reduce pigmentation and sun damage.
- Achieve a brighter and more youthful complexion.

Filters are good but Great skin is better

ULTRAPULSE CO₂ LASER:

Need a skin transformation? Ultrapulse CO₂ laser delivers dramatic results, smoothing wrinkles and tightening skin for a youthful appearance. This ablative skin resurfacing procedure uses high-energy laser pulses to remove damaged skin layers, stimulate collagen production, and tighten the skin.

Benefits:

- Dramatically reduce wrinkles and fine lines.
- Tighten & rejuvenate sagging skin.
- Achieve significant improvement in skin texture and tone.

ENDOLIFT

Lift, firm, and rejuvenate! Endolift is a minimally invasive laser treatment that uses laser technology to tighten and lift sagging skin on the face and neck, providing a non-surgical alternative to a facelift.

Benefits:

- Lift and firm sagging skin.
- Improve jawline definition and contour.
- Achieve a more youthful and refreshed appearance.
